### **Suspension and expulsion of children §746.501 (8)**

Unfortunately, there are sometimes reasons we have to expel a child from our program either on a short term or permanent basis. We want you to know that we will do everything possible to work with the family of the child(ren) in order to prevent this policy from being enforced. The following are reasons we may have to expel or suspend a child from this center:

#### IMMEDIATE CAUSES FOR EXPULSION

- The child is at risk of causing serious injury to other children or him/herself.
- Parent threatens physical or intimidating actions towards staff members.
- Parents exhibits verbal abuse to staff in front of enrolled children.

#### PARENTAL ACTIONS FOR CHILD'S EXPULSION

- Failure to pay/habitual lateness in payments.
- Failure to complete required forms including the child's immunization records.
- Habitual tardiness when picking up your child. Verbal abuse to staff.

#### CHILD'S ACTIONS FOR EXPULSION

- Failure of child to adjust after a reasonable amount of time.
- Uncontrollable tantrums/angry outbursts.
- Ongoing physical or verbal abuse to staff or other children.
- Excessive biting.

In the realm of challenging behavior from a child enrolled, we will take proper steps to help guide the child in a positive manner. If this does not help, then the parent will be notified and involved. Prior to expulsion, a parent will be called and correspondence will be sent home indicating the problem at hand; and every effort will be made by both the center and the parent to correct the problem. If, after one or two weeks, depending on the risk to other children's welfare or safety, behavior does not improve, and the center finds that they can no longer accommodate the child, the parent will be asked to remove him/her. The parent will be given a minimum of one week's notice to find another center to provide care for this child.

### **Safe sleep policy §746.501 (9)**

We believe that a safe sleep environment for infants helps lower the chances of an infant dying from SIDS, and that parents and child care providers can work together to provide a safe sleep environment. Child care providers caring for infants 12 months of age or younger, are required to implement a safe sleep policy, share the safe sleep policy with parents/guardians, and participate in Infant-Toddler Safe Sleep and SIDS Risk Reduction in Child Care training. All parents with children 12 months and younger will sign the policy ensuring safe sleep practices.

### **Promotion of indoor and outdoor physical activity 746.501 (18)**

#### (A) The benefits of physical activity and outdoor play

Time spent outdoors has been found to be a strong, consistent predictor of children's physical activity. Children can accumulate opportunities for activity over the course of several shorter segments of at least 10 minutes each. Free play, active play, and outdoor play are essential components of young children's development. Children learn through play, developing gross motor, socioemotional, and cognitive skills. During outdoor play, children learn about their environment, science, and nature.

Infants' and young children's participation in physical activity is critical to their overall health, development of motor skills, social skills, and maintenance of healthy weight. Daily physical activity promotes young children's gross motor development and provides numerous health benefits, including improved fitness and cardiovascular health, healthy bone development, improved sleep, and improved mood and sense of well-being.

Toddlers and preschoolers generally accumulate moderate to vigorous physical activity over the course of the day in very short bursts (15–30 seconds). Children may be able to learn better during or immediately after these types of short bursts of physical activity, due to improved attention and focus.

Tummy time prepares infants to be able to slide on their bellies and crawl. As infants grow older and stronger, they will need more time on their tummies to build their own strength.

All children, 2 months to 13 years of age, should participate daily in:

- a. Two occasions of active play outdoors, weather permitting
- b. Two or more structured or caregiver/teacher/adult-led activities or games that promote movement over the course of the day—indoor or outdoor
- c. Continuous opportunities to develop and practice age-appropriate gross motor and movement skills

The total time allotted for outdoor play and moderate to vigorous indoor or outdoor physical activity can be adjusted for the age group and weather conditions.

#### **The duration of physical activity at your operation, both indoor and outdoor**

30 mins of structured and non-structured activity twice a day. (60 mins activity for a day)

#### **The type of physical activity (structured and unstructured) that children may engage in at your operation**

To make sure your child gets his daily dose of active play, try:

Catch or kickball (experiment with balls of different sizes and textures)

Crawling through a cardboard-box tunnel

Dancing: Add scarves or ribbons to make it more exciting

Indoor obstacle course: Build one together using sofa cushions, hula hoops (to jump in and out of), chairs lined up to form a tunnel or balance beam, etc.

### **Each setting in which your physical activity program will take place**

Indoor and outdoors

### **The recommended clothing and footwear that will allow a child to participate freely and safely in physical activities**

Children will wear comfortable shoes and weather appropriate clothing.

### **A plan to ensure physical activity occurs on days when extreme weather conditions prohibit or limit outdoor play.**

An alternate activity will be planned when extreme weather conditions prohibit or limit outdoor play. Activities can include yoga, dance, duck duck goose, musical chairs and more.

### **Curriculum:**

**Preschool Palace and Read by 5 curriculums are used for children ages 3 and up. It is a 10-month curriculum that encompasses:**

10 Month Preschool Program

- \* daily preschool lesson plans
- \* circle time posters for each letter, number, shape, and color
- \* letter recognition & phonics
- \* number recognition & math concepts
- \* shapes
- \* colors
- \* arts & crafts
- \* movement games
- \* fine motor and sensory activities
- \* dramatic play

### **Limited Use of Technology:**

The first few years of life are critical for development of mental, physical and social skills. Excessive media time reduces creative free play, exploring, interacting with children and adults, and vigorous physical activity. Increased TV and other media exposure may influence development and behavior (e.g., requesting and eating less healthy foods advertised in the media, delayed language development, and heightened aggressive behavior) Young children benefit from an environment that promotes development of the whole child; play is the essential work of children. As many children spend much of their day in early care and education programs, caregivers/teachers can model healthy lifestyles and teach children to make healthy choices. Brainy Bees allow only 45 mins to 1 hour of screentime throughout the day. The screentime usually encompasses dancing following steps on the TV or schoolers using tablets for research.

### **Family Engagaement:**

At BrainyBees Childcare Center, we believe that strong family engagement is vital to providing a nurturing and supportive environment for the growth and development of each child. We recognize the essential role that families play
